

Underground Mine Tunnel Lighting 24V Self-Adhesive 4000K LED Aluminum Slot Soft Light Strip

Our Product Introduction

for more products please visit us on led-stripslights.com

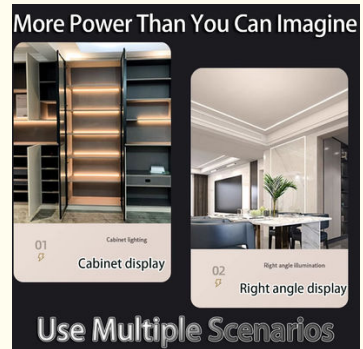

Basic Information

- Place of Origin: SHENZHEN CHINA
- Brand Name: YSENLED
- Certification: CE ROHS LVD EMS
- Model Number: YS-R120X2835RAF3
- Minimum Order Quantity: 10
- Price: Negotiable
- Packaging Details: 10*1000*20
- Delivery Time: 2DAYS
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100,000 meters per week

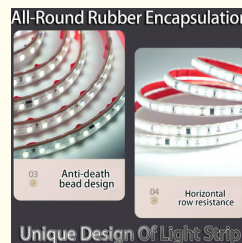

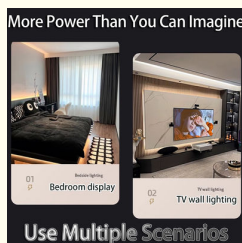

Product Specification

- Cutting Unit: 3 LEDs/6 LEDs
- Beam Angle: 120°
- Color: White Color, RGB For Option
- Lamp Body Material: Silicone
- Specification: Atex Msha Standard
- Width: 10mm
- Input Voltage: DC5V
- Light Source: LED
- Outer Material: Silicone
- Function: Underground Mine Tunnel Lighting
- Led Qty: 600pcs/ Roll
- Waterproof Rate: IP20/IP65/IP67/IP68
- Input Frequency: 50/60 HZ
- Emitting Color: White
- Protect Grade: IP68

Product Description

The following is a detailed introduction to the full-spectrum cob light strip low voltage 24V self-adhesive backing 4000K ultra-thin LED aluminum groove soft light strip wine cabinet linear light:

Our Product

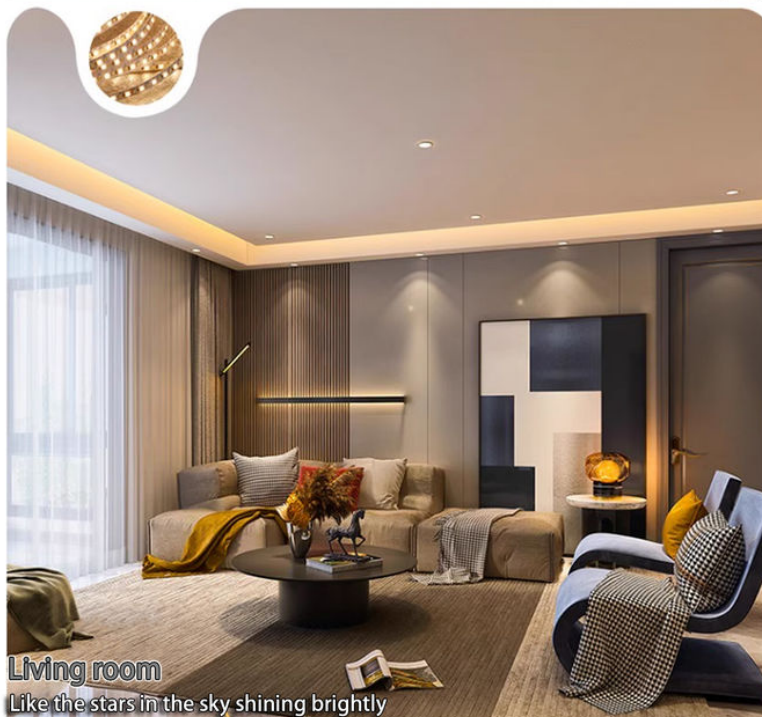

1. Product Overview

The full-spectrum cob light strip adopts advanced cob (Chip On Board) packaging technology to directly package the LED chip on the substrate, achieving higher luminous efficiency and better heat dissipation performance. The operating voltage of the light strip is low voltage 24V, ensuring safe use. At the same time, it is equipped with a self-adhesive backing to facilitate users to install and fix. The neutral light color temperature of 4000K makes the light soft and natural, which is very suitable for wine cabinets, display cabinets and other places where the color and texture of objects need to be highlighted.

Like the stars in the sky shining brightly

2. Product Features

Ultra-thin design: The light strip adopts an ultra-thin design, which can be easily embedded in various narrow slits and grooves, without taking up too much space, while keeping it beautiful and tidy.

High color rendering index: The full-spectrum cob light strip has a high color rendering index, which can truly restore the color of the object, making the display effect more realistic and vivid.

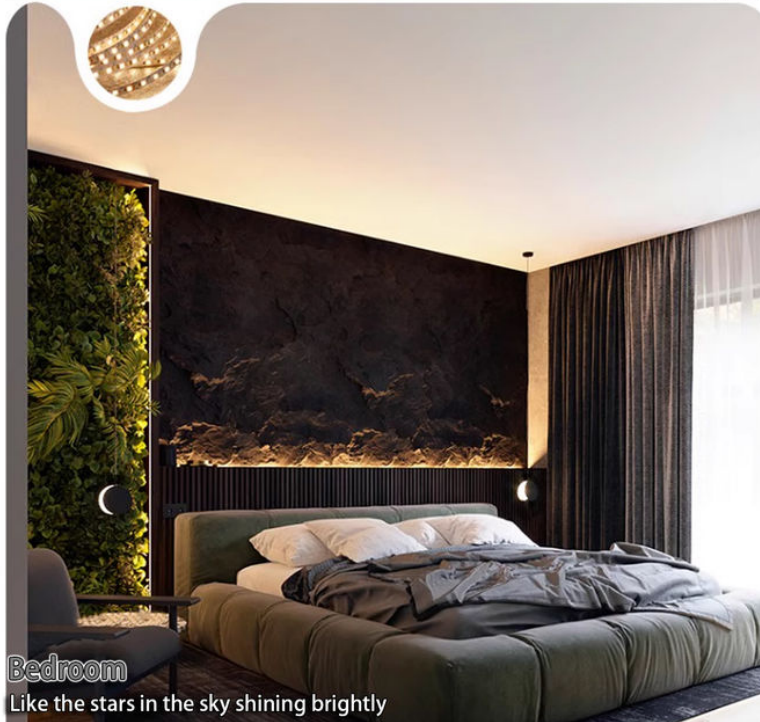

No flicker: constant current driving technology is used to ensure that the light strip has no flicker during operation and protect the user's vision.

Energy saving and environmental protection: LED light strips have the characteristics of low power consumption and long life, which are more energy-saving and environmentally friendly than traditional lighting products.

Easy to install: the self-adhesive backing design allows the light strip to be easily pasted on various planes without the need for additional fixings.

3. Technical parameters

Working voltage: 24V

Color temperature: 4000K (neutral light)

Luminous efficiency: high (specific values vary from product to product)

Power factor: ≥ 0.9 (high efficiency)

Beam angle: generally wide angle, suitable for large area lighting

Effective life: up to tens of thousands of hours, the specific life depends on the use environment and conditions

Dense Lamp Beads Emit Light Evenly

There are 120 lamp beads per meter length

Corrosion
resistance

4. Application scenarios

Full spectrum cob light strip low voltage 24V self-adhesive backing 4000K ultra-thin LED aluminum groove soft light strip wine cabinet linear light is very suitable for the following places:

Wine cabinets and display cabinets: used to highlight the color and texture of displayed items and enhance the overall display effect.

Home decoration: Auxiliary lighting for living rooms, bedrooms and other spaces to create a warm and comfortable atmosphere.

Commercial places: Shelf lighting in retail places such as shopping malls and supermarkets, and display lighting in exhibition places such as museums and

exhibition halls.

Even light output with
almost no graininess

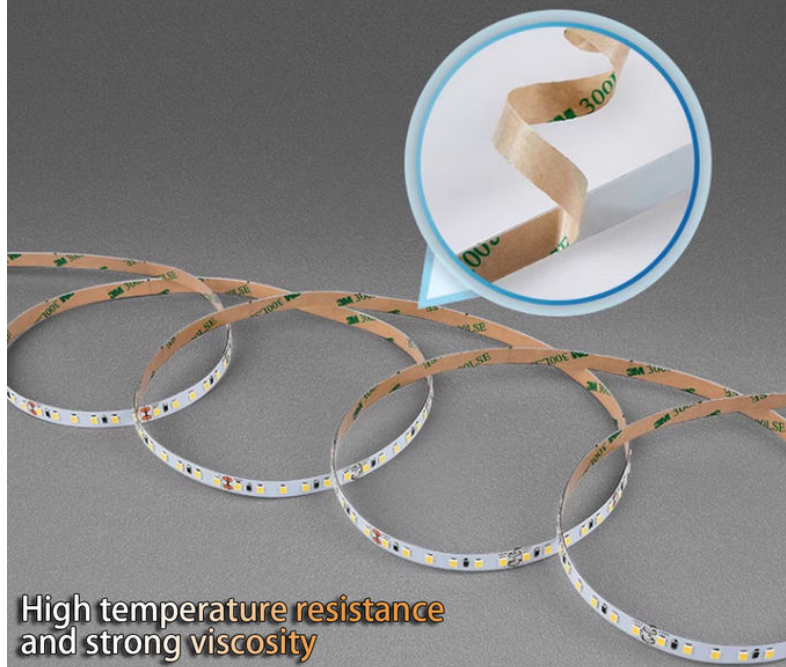

24v Safety Voltage Free Cutting

24V SAFETY VOLTAGE · FREE CUTTING

Double-sided Adhesive For Lossless Installation

The back of the light strip uses double-sided adhesive

High temperature resistance
and strong viscosity

5. Installation and maintenance

Installation: Make sure the installation location is flat, dry and dust-free. Tear off the self-adhesive backing of the light strip and stick it on the predetermined position. Connect the power supply and test whether the light strip works properly.

Maintenance: Clean the dust and dirt on the surface of the light strip regularly to maintain its good luminous effect. Avoid exposing the light strip to high temperature, humidity or corrosive environment for a long time.

In short, the full-spectrum cob light strip low voltage 24V self-adhesive backing 4000K ultra-thin LED aluminum groove soft light strip wine cabinet linear light is a lighting product with excellent performance, easy installation and maintenance, suitable for a variety of places and uses.
